

KHANYISA COTTAGE

Shine the light of Truth that comforts and heals

Christian Science nursing care is available to anyone who is relying on Christian Science for healing.

Khanyisa Cottage, a tranquil, fully equipped Christian Science nursing care room in a private cottage in Gillitts, KwaZulu-Natal, is optional accommodation during this period.

These short-term stays are available to anyone in the country - with the expectancy of quick and complete healing.

The care given to patients staying in Khanyisa Cottage is provided by Private Duty South African Christian Science nurses (i.e self-employed) in training through the Le Verger Christian Science Nursing Education programme that began in South Africa in 2020.

Rest and study visitors wanting to spend quiet time in prayer and study to deepen their understanding of God and Christian Science are also welcome to visit Khanyisa Cottage for short-term stays.

- Khanyisa Cottage is not the only care room option. The Christian Science Care Association helps finance suitable accommodation that is convenient for you, wherever you live in the country.

Costs shouldn't be an obstacle to anyone receiving care from a Christian Science nurse - whether it's at home or in a care room. Financial aid is available.

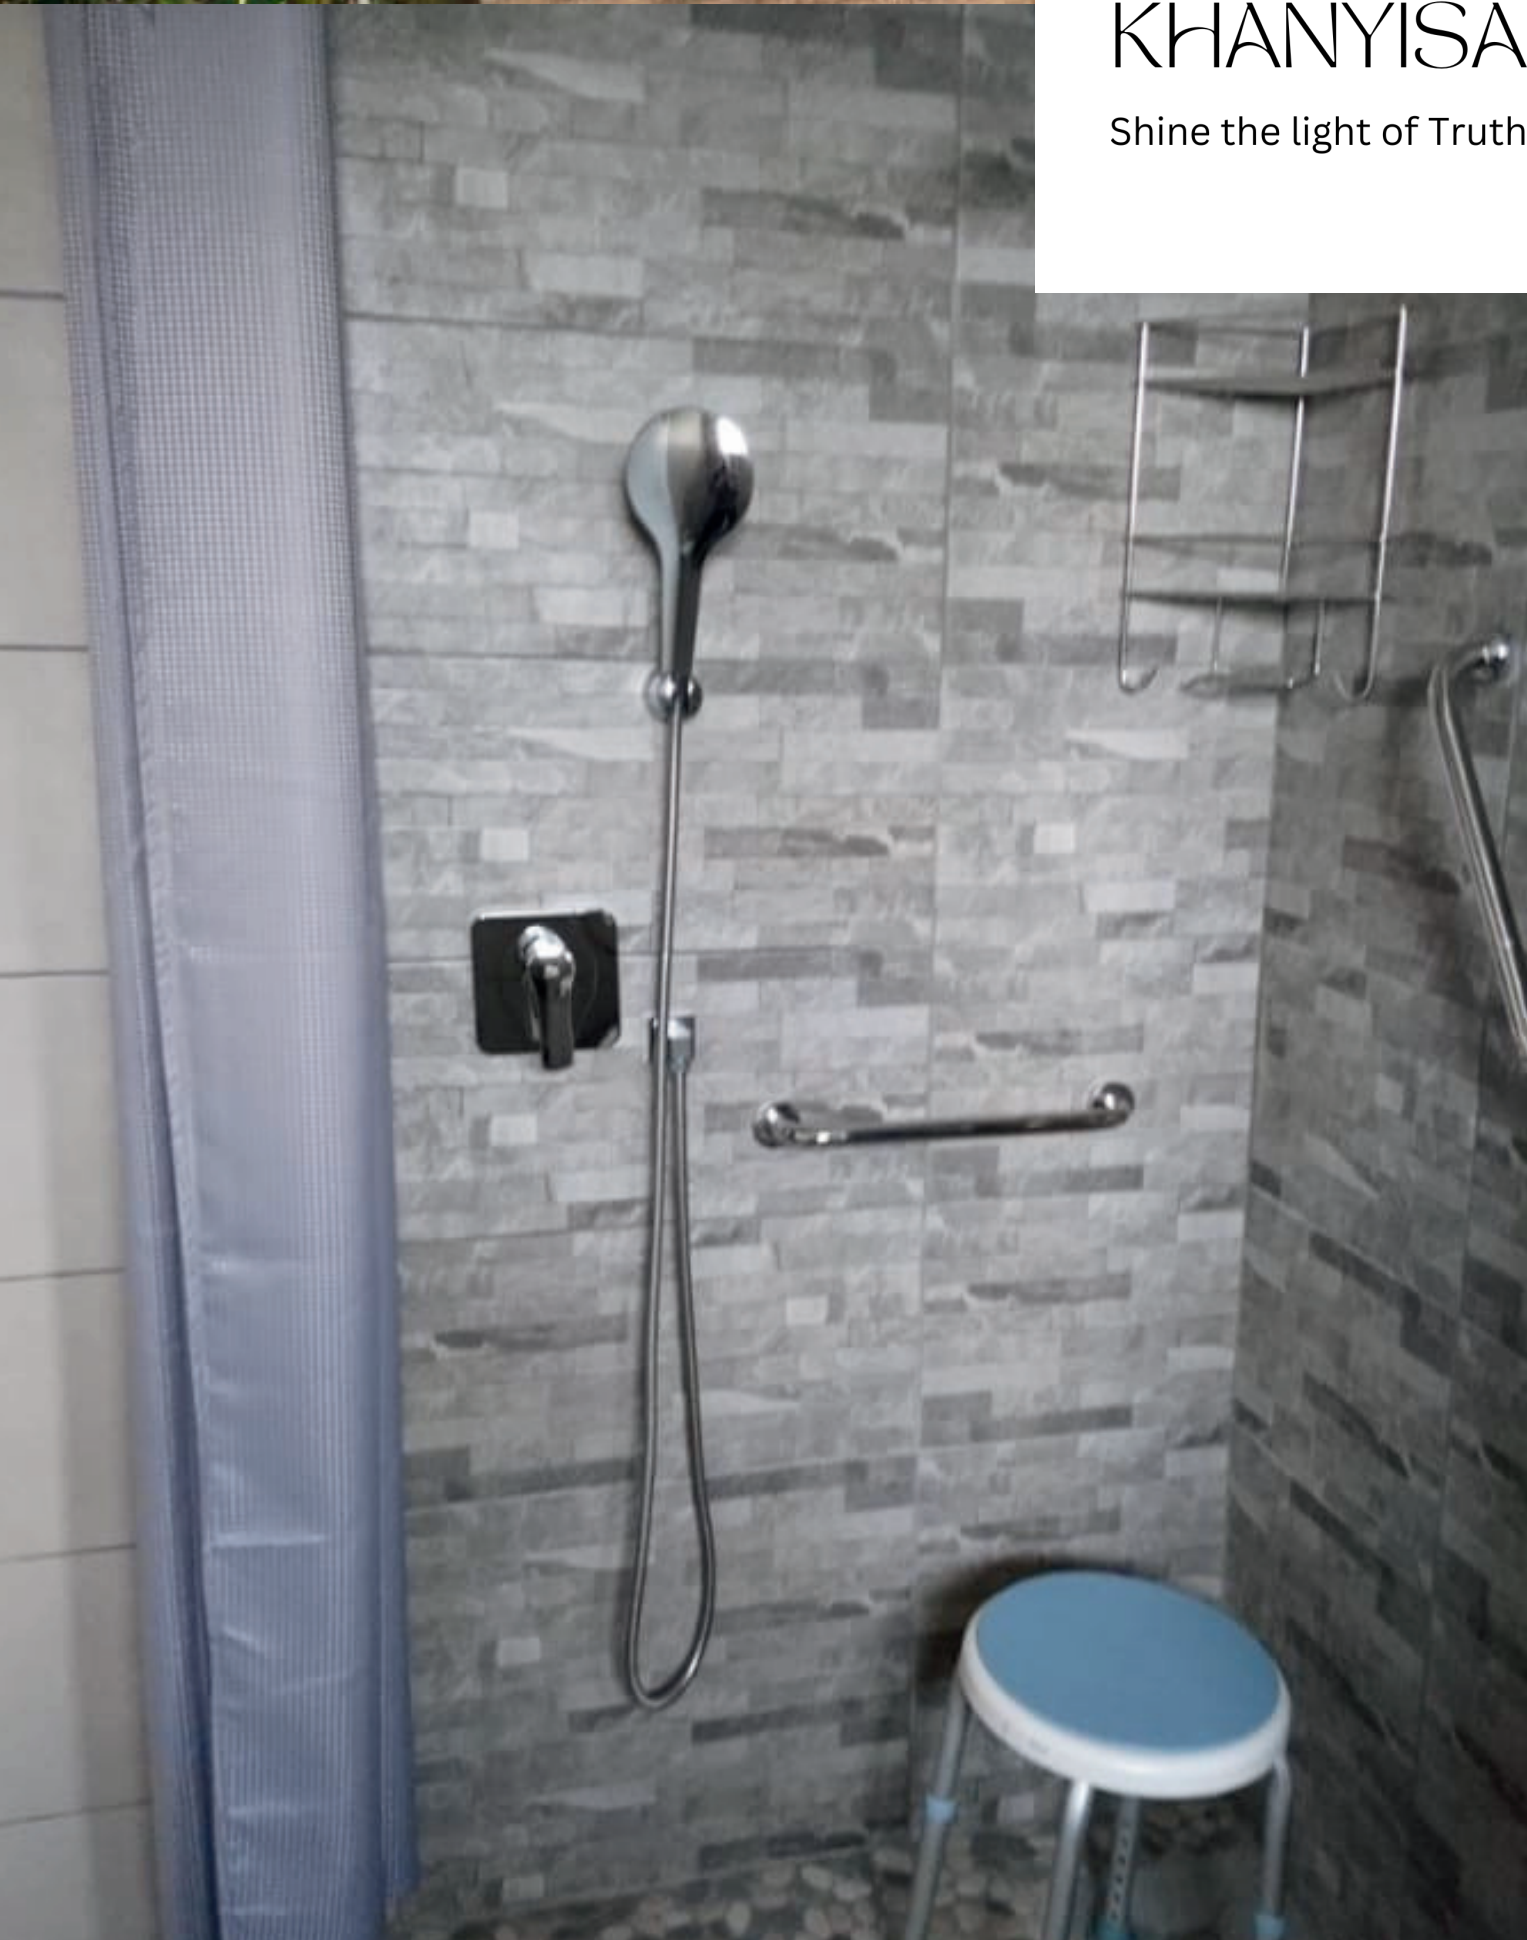

You're welcome to contact us for more information on how financial support works.
